Education

United College of Engineering & Research **September 2024 – June 2028**

Bachelor of Technology (CSE), CGPA: 7

Coursework: **Data Structure & Algorithm, Object Oriented Programming, Web Development, Operating System, Database Management System, Computer Networks**

Projects

PathForge AI {React.js, Next.js, Node.js, Express.js, MongoDB, Gemini AI} **Live Link | GitHub**

- Deployed a full-stack AI-powered career guidance platform, generating personalized roadmaps across 10+ career tracks and 50+ skill pathways with sub-3-second AI response time.
- Engineered responsive frontend interfaces using React.js and Next.js, and developed scalable backend services with Node.js, Express.js, and MongoDB to support real-time roadmap generation.
- Integrated MCP-based AI recommendation engine and deployed the full application on Vercel and Render, achieving fast inference and reliable uptime.

ThoughtBoard {React.js, Tailwind CSS, REST APIs} **Live Link | GitHub**

- Built a note-taking web application using React.js, Tailwind CSS, enabling seamless CRUD operations and efficient data management.
- Implemented and tested RESTful APIs with Postman.
- Developed an intuitive, accessible user interface and optimized frontend performance to ensure smooth interactions and cross-device compatibility.

CareSphere Health (Frontend Project) {HTML5, CSS3} **Live Link | GitHub**

- Created a fully responsive healthcare website using HTML5 and CSS3, featuring structured sections for Services, Doctors, and Appointment Booking with a clean, user-friendly interface.
- Crafted reusable UI components including navigation bars, service cards, and forms, improving consistency, readability, and overall user experience.

Education {HTML5, CSS3} **Live Link | GitHub**

- Developed a responsive educational website using HTML5 and CSS3, providing a clean and engaging platform for learning resources.
- Designed structured sections and intuitive navigation, ensuring accessibility and a seamless user experience across different devices.

Technical Skills

- **Languages:** C, C++, HTML5, CSS3, JavaScript (ES6+), Python, TypeScript
- **Frameworks & Libraries:** React.js, Tailwind CSS, Node.js, Express.js
- **Tools & Technology:** Git, GitHub, VS Code, Vercel, MCP, Gemini AI, MongoDB (Database), Vitest, JWT, AntiGravity
- **Concepts:** Responsive Design, Rest APIs, CRUD Operations, Cross-Browser Compatibility, Basic UI/UX Principles
- **Soft Skills:** Leadership, Teamwork, Time Management, Problem Solving

Achievements & Certifications

- Open Source Contributor to **OpenMRS** Organization (Link) .
- Solved **300+** problems on LeetCode.
- **Certificate of Completion - Career Essentials in Generative AI** – Microsoft and LinkedIn Learning (July 2026)
- **Certificate of Participation - GDG Vibe Coding Hackathon 2026** Google Developer Group (GDG) Prayagraj (July 2026)
- **IBM PBEL Internship** (6 weeks) Web & Mobile Development.
